Jasmina came to know about her HIV positive status very early in her life. She was depressed and isolated herself from others. Now she is a teenager and regularly comes to the IICCHAA sessions.

When Jasmina was told about vocational training possibilities she immediately showed interest. She is doing her vocational training on tailoring at Accessive Educare at Amtala, South 24 Parganas. Jasmina said that "I never missed the class, I attend every class. I have made some friends there also. After getting training from here I can do something by myself and earn myself. I am very thankful to CINI that they have given me this opportunity."

The smile and shine on her face suggest her inner joy.
